The Most Common Questions:

What is involved in the Installation?

Ans. Installation is quick and easy. It usually takes our licensed installer/licensed plumber 1 hour or less to install the system. It's easier than installing a computer work station.

How often do I have to have the water filters changed?

Ans. Approximately every 1300 gallons (one (5) gallon bottle per day, 5 days a week, for 52 weeks) of processed water or 1 year, whichever comes first.

How will I know when to make the changes?

Ans. Generally speaking, the water flow will slow down when the filter gets close to being exhausted. Otherwise we will automatically call you and set an appointment for one of our support technicians to stop by and change the filters.

What type of maintenance do I need to do?

Ans. Very little. The biggest item is the filter changes which we take care of. You will have to take care of replacing the paper cups if you use them.

Are bottleless water coolers really better than bottled water coolers?

Ans. Absolutely. Bottled water coolers are open to the environment, require cleaning and sterilizing every 3-6 months. To Service you will need Clean rubber gloves, Paper towels, Scrub brush, scrub pad, boiling water, and about 1 hour per cooler. (see: 10 Steps to a Clean Water Dispenser)

Is the highly filtered bottleless water better than my bottled water?

Ans. Absolutely. In fact, there are unlimited ways in which bottled water can become contaminated through handling, storing and dispensing. MSNBC Report (7/8/2009) Researchers urged Americans to make bottled water "a distant second Choice" to filtered tap water...the working group recommends purifying tap water with a commercial filter. Bottled water has been suffering lately as colleges, communities and some governments take measures to limit or ban its consumption. In a survey of officials in all 50 states and the District of Columbia, the GAO found they think consumers are misinformed about bottled water.

Why Premier Water Systems?

- Special employee program, substantial discounts to all employees
